

I can think of no good reason why XM Radio should not be able to broadcast traffic & weather updates. As XM is one of the best things to ever happen to the broadcasting world, I think it behooves us and our government to give them every opportunity rightfully theirs to supply the services requested by their customers.

The whole reason I started listening to XM Radio in the first place is simply that I grew tired of hearing the same thing over and over from traditional stations. As well as commercials. Especially commercials. Now we have the chance for instant traffic & weather without having to search laboriously for a station that is airing them at the exact moment we are looking. And having to sit through 6 minutes of car dealer advertisements.

Please reject this petition and give XM Radio the freedom to exercise their First Amendment Rights. Thank you.
